

Online Safety

At Whybridge Infant School use of ICT is embedded in the curriculum across most subjects. Online safety is a key priority for the school. All devices such as ipads, laptops, computers and ipods that connect to the internet do so via the London Borough of Havering's filtered service which is run by the London Grid For Learning (LGFL). This system blocks certain websites and only allows the school's devices to access approved websites. Each term pupils have e-safety lessons to remind them about keeping safe on the internet at home and school and teach them what to do if they encounter an online safety issue. Staff have regular training on online safety to ensure they are confidently able to teach it to the children.
